Urban style

Urban style uses more industrial elements like piping and exposed brick. Unlike industrial style, it has more polished features and a modern look with a rustic feel.

Multi purpose Architectural Elements

This table can either be used for a seating area and folded down it allows for more space

<http://decoholic.org/2015/09/18/tips-for-living-in-small-spaces/>

Microwave in the cabinet to conserve space

Non Architectural Multipurpose Elements

Gives you an easy interchangeable space depending on what you are using it for at the time

<https://tinyhousebuild.com/tiny-house-furniture/>

Counter pulls out to have cooking space and storage underneath pulls out to grab utensils

<https://tinyhousebuild.com/tiny-house-furniture/>

This allows extra storage under the bed and saves space.

Tiny House Example

Owners? There are no owners yet so the company that built the house still owns it

What makes this tiny house a great and unique house?

- ❑ The house is on wheels so it is mobile to move wherever the owner wants to live.
- ❑ The house had two lofts. One for the bedroom and another for storage and a sitting area.
- ❑ The stairs have storage underneath them for storage to give more room for living area.

multipurpose use space through architectural elements and multipurpose non-architectural elements.

- ❑ Cantilevered both of the lofts for more space
- ❑ Utilizing every small space for storage
