Design Concept

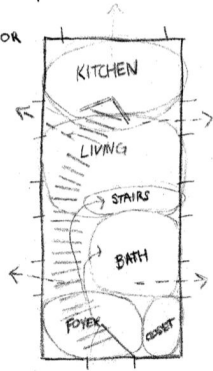

Tiny houses provide a place to feel at **home** while living a **minimalist** life. This is exactly what the client is looking for in our design. Preferring simplicity and **nature**, the client enjoys an **urban** style, bringing the outdoors in with wood finishes, natural lighting, green plants, even a cobblestone backsplash. My design exploits the **open**-feeling of **light** colors and a sitting area surrounded by windows with an open concept to the high ceiling and kitchen area. As a necessity for any tiny house, there are many built-in storage options incorporated into the design through seating, a fold-away table, lots of shelving, and closet space.
